Our Approach

Sustainable Farming

Edenberry Farm is a small holding, covering approximately 10 acres in Lake County, California. As of the spring of 2019, we have just under 5 acres planted with raspberries and blackberries. We also have a small, newly planted orchard of 300 fruit trees, and a market garden - all organic, of course!

Our Story

We are committed to farming sustainably. To do this we manage every aspect of our farm's daily working life, looking after the fields that produce our berries and the environment within and around those fields.

Opening Spring of 2021!

In the meantime, you can find us at the Lake County Farmer's market on Saturday from 10-1. At this time we have preserves, vinegars and freeze dried fruit.

Quantity: 1
