Short Description Market Goat

Validation Tag or Show reference# 6854

County San Joaquin

City Manteca

Animal Weight (in Pounds) 92

Date of Reported Weight 05/31/2021

Description

1 Head, Market Goat, Eartag #21017. Sired by Tinder from Top of the Hill Show Stock. 89 lbs named JD.

JD got 2nd in his market class and did amazing! As a team me and JD were able to place third overall in advanced showmanship. JD is on a textured lamb feed and goat pellet and a vitamin supplement for added nutrients. He is also given a handful of alfalfa at night to help his ruminant digestive system. JD has been wormed once a month to prevent any parasite issues. JD enjoys walks and he gets his legs washed every other day to promote hair growth.

This year was an especially challenging year as a college freshman, but I enjoyed every minute of it. This is my second year raising a market goat, the past three years I have raised two market sheep and one market goat. As this is the last year that I will be eligible to show at San Joaquin Ag Fest, I wanted to make it the best and go all out. JD has been

an amazing project and I have learned many new skills from my project and look forward to pursuing a career in the agriculture industry. I will be attending Modesto Junior College in the fall and continuing majoring in animal science, the money I raise from this project will help cover further college expenses. Overall JD has been an amazing project!

Quantity: 92
