Short Description 161 pounds of muscle

County Bexar

City San Antonio

Animal Weight (in Pounds) 161

Date of Reported Weight 01/08/2022

Description

Lambo is a special lamb. I have raised lambs before but never have encountered one like him. It was a challenging beginning but after we got to know each other everything fell into place. This show year I have learned the value of asking for help and for other opinions, how to better my showing and better Lambos ability. I learned how changing the way you have raised animals in the past does not work for every animal. I learn to adapt this season and take what's thrown at me.

Quantity: 1
