### **Description**

When I first received my chickens, I immediately went to work on them making sure they always had food and water. Doing this, and keeping up with school work proves to be harder than you would think, but I persisted. I continue to check on the chickens numerous times a day to make sure they have plenty of feed and water, and clean shavings to rest on. After spending so many hours taking care of my chickens, I am excited to get in the ring to show them!
