Description

This is my first time raising Chickens and I did not realize how much work having 50 chickens would be. I did a lot of research before we got them about how to set up the pen and what temperature to keep them at and how much food to feed them. The chickens ate a lot of food, which means I had to do a lot of cleaning and adding new bedding to keep them clean. It was a very fast pace and quick growing project. I had a lot of fun raising the chickens and watching my mom call them crazy names like "chicken nuggets" and "chicken dinner". I would appreciate your consideration in bidding on my chicken. The money I make from the sell will help me afford the feed needed to do this project next year.
