### **Description**

This is Golden Child because that is exactly what he is. He comes from good genetics, and he has been on great feed and cared for daily. This is my second year in the market goat project, and I have learned a lot last year that I was able to implement this year. My favorite part of the project is being hands on and working with Golden Child each day to help him be the best he can be. While I participate in a few different projects, I have been able to use my time management skills to ensure Golden Child is worked each day.
