Validation Tag or Show reference# 8231

County San Joaquin

City Lodi

Animal Weight (in Pounds) 125

Date of Reported Weight 05/24/2020

Description

Hey Everyone,

Say hello to Marty! Marty is a Suffolk/Hamp cross lamb that weighed in at 10.5 pounds after a difficult birth where I had to help reposition and pull him out!!! Marty is my first ever ranch born lamb for my small 4H sheep breeding project of 2 ewes. Helping to deliver and raise Marty since birth has not only made my 4th year raising sheep the most memorable, it has also taught me the most throughout the process. I was scared when I realized something was wrong and he was stuck, but I learned that having a lot of patience when I needed to keep repositioning him, the courage to reach into my ewe to do that, and by asking adults for guidance I was able to overcome my fears and successfully deliver him. In the past 6 months, besides giving shots and docking tails, I learned how to register my small flock to get my own scrapie tags, weaning techniques and have monitored his weight and feedings for best rate of gain. His last weigh in

was on 5/24/20 and he weighed 125 lbs, we predict that at auction time he should be finishing out around 143 lbs. Thank you for reading about my adventures with Marty this year, you can look at some pictures I uploaded that were taken along the way. I appreciate your support and will be reinvesting my profits towards breeding my ewes again for next year's Agfest, as well as my other animal and school activity expenses.
