County Merced

City Atwater

Animal Weight (in Pounds) 245

Date of Reported Weight 05/28/2020

Description

Meet my amazing Yorkshire Leia. When I first got her back in February she weighed approximately 90 pounds, now she weighs approximately 245 pounds. I have been able to raise her for the past three months to get her ready for show and she is making great progress. Through my SAE I have been able to learn about the daily task of feeding, walking, and grooming my pig, as well as about the aspects of the agriculture industry that include communication, networking and finance. I couldn't wait to show Leia at the fair and I am sad that that was unable to happen.

Quantity: 1
