Validation Tag or Show reference# JBL01
County San Joaquin
City Acampo
Animal Weight (in Pounds) 2.44
Date of Reported Weight 05/15/2020

## **Description**

Meet my red eyed Californian Market Rabbit Sushi. I got him from a breeder in Lodi, California with four of his siblings. He weighed 1.56 lb at 1 month and 10 days old. I can tell he loves his food because during feeding time he climbs over siblings trying to be the first one to eat. When rabbits are raised together they eat more and he is no exception. Over recent weeks the weather has changed with some very hot days. We bring them in on these days because they can get heat exhaustion. When they are very young, they can be even more sensitive the heat than when they are older. Sushi also loves to snuggle with his siblings jump around with them. A happy rabbit is a healthy rabbit!
